## PROJECTS

---

**Jobility: Job Finder App For Differently-Abled Person** | *Flutter, NodeJS, Firebase, MongoDB, Railways*

- Built an accessible job-matching platform with skill-based and disability-aware recommendations.
- Implemented real-time sign language video chat using SIGNALL for inclusive communication.
- Chosen as the school's Capstone Research for PSITS and won First Place.

**Klio: Student Accommodation Finder Platform** | *Next.js, Node.js, PostgreSQL, Prisma, Mapbox, Turborepo*

- Developed a platform for students in South Cotabato to find boarding houses, apartments, and dormitories.
- Enabled landlords to list, manage, and promote their rental properties.
- Implemented a real-time interactive map using Mapbox for property discovery and navigation.

*Status: This project is still in development.*

## EXPERIENCE

---

**Team Lead Developer**

June 2025 – August 2025

*Asset Transport Group | Project Based*

*Remote*

- Led a small team in developing modules for a transportation management system.
- Worked on both backend (NestJS, Express, MySQL, MongoDB) and frontend (React, PHP) features.
- Reviewed code, assigned tasks, and supported teammates with technical issues.

**Full-Stack Developer Intern**

July 2024 – October 2024

*CodeCollective IT Solutions*

*Tupi, Philippines*

- Develop an information system for SK LYDO in Tupi to improve record management.
- Implemented a sales reporting feature to Polaris Rx Pharmacy's POS system using Jasper Reports.

**Full Stack Developer**

March 2024 – Present

*Freelancer*

*Remote*

- Built custom web apps for students and local clients, mostly capstone and thesis projects.
- Developed systems like library management, inventory, payroll, and scheduling tools.
- Handled the full development process from gathering requirements to deployment.
